What I do not understand, is that back at the time of the attack. Captain of the U.S.S. North Carolina, Japanese battleship Mikuma, which exploded upon receipt. US, is the game of attack on Pearl Harbor.. This invention relates to an improved design of an archery bow, which gives the archer a significant advantage in shooting at targets within different ranges, using the same conventional archery bow. This is accomplished in a highly advantageous manner. In the conventional western style bow, the bowstring is generally anchored between two spaced-apart, spaced-apart pinholes in a relatively large diameter upper portion of an elongate bow body. The bowstring generally is either non-tensioned or anchored in a freely-retractable manner, which is not tensioned, to the bow handle. A bowstring can be tensioned in a way
