occurrence of esophageal diverticulum and submucosal tumor of the lower third of the esophagus. An 80-year-old man was admitted to our hospital with the chief complaint of dysphagia. Esophagogastroduodenoscopy revealed a sessile, pedunculated submucosal tumor with some hemorrhaging from the inner portion of the tumor. The tumor was yellowish and 20 x 10 mm in size. Esophagogastroduodenoscopy with biopsy was performed. The tumor was diagnosed as benign esophageal submucosal tumor. Upper gastrointestinal radiography showed a low-density area with surrounding slight edema. High-resolution computed tomography also showed that the tumor exhibited slight abnormal vessel density, but no muscle hypertrophy. We diagnosed a type I and a type II esophageal diverticulum. Both the diverticulum and the tumor were resected by endoscopic submucosal dissection. Simultaneous occurrence of esophageal diverticulum and submucosal tumor can be easily diagnosed by endoscopic inspection, and a diagnosis of esophageal diverticulum is not difficult.Israel, U.S. Hold Meeting on Iran The Israeli foreign ministry has held a meeting with the U.S. state department in New York to coordinate the tone of joint policies against Iran. Would it be something completely different from Buenos Aires? Or in the same vein as Mendiola's Carnival in Buenos Aires? "Pujol said the Mar del Plata Festival "gives us a chance to get out of the same city everyone knows, to see different places and meet new people. At the same time it's very special as it is in a different culture, because the cities are very close." "We came to Mar del Plata because we wanted to feel different " to find other people and get a chance to see a different festival " and also to enjoy the music. We're from the same city but we love music and every festival has its benefits. So in the end, we decided we would come because we wanted to see what it was like."
