Fill And Cross Trick Or Treat 3 (Latest)

World War II is the great turning point in history and it changed the face of Europe and the world. This brand new game, the sequel to the award-winning 1940's RTS classic won the Nordic Games Best Strategy Game 2013 title. In this game it's 1942 and the World War II has raged for some three years now. This should not have come as a surprise as even back then the division between the Axis and Allied nations was clear, but for all that we are now facing a very dark time as the world is on the brink of a huge upheaval. Our mission is clear, save the Allied nations as best we can. Who is the Allied side?

The Allied forces are represented by several nationalities, from the US and UK to the Fascist Japan and the Soviet Union. The Japanese comprise the biggest portion of our units, so we have no illusions that we can cut a deal with the Axis. Our main allies are the US and UK who we assist with supplies, trade and intelligence. Of course, the US and UK have their own strategic enemies in the Soviet Union and the Nazi Germany. Who is the Axis? It is the team comprised of Germany, Italy, and Japan. They are also divided into two divisions: the Italian on the Axis and the German on the Allied side. The Axis nations have a different goal, their main goal is to fight for control over Europe. The Italian part of the Axis wants to grab a piece of the French coast and part of the Spanish while the German part wants to conquer the whole of the west. All of the nations join the war at the same time, so the struggle for dominance will last until the end of the game, and it is unlikely that anyone will emerge as a clear winner. Graphics and Sound: The graphics are inspired by the 1940's, but the look is also inspired by widescreen CRT monitors of the time. Every unit, building, and weapon is destructible, but the game also offers plenty of out-of-the-way units that can be hidden from view, so a battle that looks easy on the ground can change into a serious encounter on the wing. The sound design is focused on a realistic portrayal of WWII, from real sounds such as gunfire and explosions to diegetic sounds like the voices of the generals giving orders and the units performing their duties.
