Capacity building in China's public health sector: a pilot study. The National Centers for Disease Control and Prevention of the People's Republic of China (NCDPC) identifies capacity building as one of its national priorities. Despite the growing recognition of the importance of capacity building, the impact of such efforts remains unclear. We describe a pilot study undertaken to describe the current capacity-building efforts in China's public health sector and to examine the performance of such efforts in China. The study employed the Bureau of Census of China's annual government report to the National Health and Family Planning Commission. The census data provide information on capacity-building efforts in health development programs at provincial and county levels from 2005 to 2008. Data on annual growth of key indicators of health systems in China from 2004 to 2008
