The specter of Japan's declining population and shunning of small families looms over a long-dead Liberal-era dream of re-establishing Japan's military glory. After Prime Minister Shinzo Abe's triumphal visit to Pearl Harbor in late November, the resurgence of Japan's military appears to be underway. Why it matters: Abe appears ready to end 40 years of diplomatic stonewalling and hostility toward the country's wartime past as part of the "reinterpretation of history" drive that should symbolize his second term in office. This move could portend greater defense spending, which analysts say would be a major boon for manufacturers and part of Tokyo's "Abenomics" economic revival plan. Why it matters: Trump believes that Japan has not been dealing adequately with its "rapidly" declining population. And he is ready to exact a reparations treaty that Tokyo says is standard. WHAT TO WATCH: Civilian financial support for Japan's self-defense forces: One of Abe's most urgent priorities is to end Japan's rules preventing U.S. military aid. WHEN TO WATCH: 10 a.m.: Trump is scheduled to depart this evening for Florida, where he is expected to speak during the evening. He is likely to discuss the Japan-U.S. trade deal, as well as his upcoming summit with Chinese President Xi Jinping. 5 p.m.: Trump is scheduled to speak during the evening at an event at a club in Palm Beach, Florida. The big picture: REACTION TO TRUMP'S HANDLING OF U.S.-JAPAN RELATIONS Japanese Foreign Minister Fumio Kishida said Thursday that Trump's plan for a major announcement on trade next week is the "first step in a long and winding road." The Japan Times poll: Two out of three respondents, which is a slight drop from last month, said that Trump's behavior in relations with other countries had made them more confident in his ability to handle diplomacy.Major League Baseball games will be back on SiriusXM Radio this season and XM will be the home of all 30 teams, including the Toronto Blue Jays. Starting with Thursday's games, fans will be able to listen to Blue Jays games on SIRI

Q: Check if record contains empty rows I'm creating a SQL Query with Entity Framework. I want to search through a certain field in my database. That field might contain empty values. Now I want to check if there are any empty values in there, because I don't want to run an SQL query for all records if there are only empty values. The thing is that I don't want to do anything with the empty values, I just want to know if there are any empty values there or not. I'm already storing all records to a List of records. So, my question is: What's the most elegant way to do it? A: If it is always just empty strings and not something else, you can use: if (String.IsNullOrEmpty(someTextField)) { } If the field is some sort of collection (for example, a text field that might be empty, and also have null items, you'd need to go a bit deeper to check the null vs empty values. Q: Modelling the phrase "If it hasn't been tried, why does it matter" I am trying to model the phrase "If it hasn't been tried, why does it matter" i.e. how do I model "It hasn't been tried" and how do I model "Why does it matter". I tried the following: Any other way to describe the sentence? like "If we knew that it had been tried, then..."? Why is it "it" is used? e.g. compare "If it had been tried,..." A: "It hasn't been tried, so why does it matter?" could be explained in many different ways, but all of them will involve at least: "It" as a common gender in the sentence Placing the sentence in the past in relation to a hypothetical scenario Examples: If it had been tried, it would not matter. If it had not been tried, why should I know? If it had not been tried and successful, would I know any better? If it had been tried and had failed, would I know any better? If it had not been tried but was accepted as a fact, does that change the outcome of the sentence? If it had not been tried but was accepted as a fact, does that change the outcome of
